## *Interstate Warehousing Plans To Expand Franklin, IN Facility*

(Fort Wayne, IN) - Interstate Warehousing, Inc. has announced plans to add a 135,000 square foot expansion to the IWI facility in Franklin, Indiana, just outside of Indianapolis.

The Franklin facility is one of Interstate Warehousing's newest facilities, originally completed in July, 2005 and recent growth within the company has created the need for expansion.

This second phase of construction will add 135,000 square feet and approximately 40,000

pallet positions to the facility when it is complete. The addition, which is being designed and built by Tippmann Construction, Inc., will be capable of both cooler and freezer temperatures, and is scheduled to be completed in the fall of 2008.

The Interstate Warehousing - Franklin facility is strategically located immediately off I-65 at State Road 44, just 15 miles south of Indianapolis.
